

Synchronous Analog Clock

AC-1224

DC-Digital™ Clocks
The True Two Wire System

Features

- Hourly and 12-hour correction
- Surface and flush available
- Full steel case
- 24VAC or 120VAC operation
- 2- year warranty
- Simple to install
- Low-voltage operation
- Toll-free factory assistance

Specifications

- Display 12" round with red sweep second hand
- Case Steel 22 guage; 13.25"W x 3.25D
- Weight 5.0 pounds
- Power Source 24VAC 60hz at 125mA
- Operating Temp. 0° to 49° Celsius (32° to 120° Fahrenheit)
- Case Finish Black powder coating
- Cabling Three wires required

AC-1224 Clock Description

AC-Analog Clocks may be surface or flush mounted. AC-Analog Clocks are designed to run and reset off three wires. This design can be used in either existing building or new construction. AC-Analog Clocks can be linked via most master clocks to form a 12-hour automatic correction system.
