

2.3" Six-Digit Clock

DC-256

DC-Digital™ Clocks
The True Two Wire System

Features

- Only two wires required
- Solid state
- Surface or flush mount
- Low voltage operation
- 5-year warranty
- 2.3" super bright display
- Patented clock design
- 24 or 120-Volt AC operation

Specifications

- Display Six digit; seven segment; green or red LED display
- Case Steel; 12.62"W x 5.25"H x 2.12"D
- Weight 2.0 pounds
- Power Source DC-256 24VDC at 350mA
AC-256 24VAC 60Hz at 350mA
AC-256A 120VAC 60Hz at 90mA
- Operating Temp. 0° to 49° Celsius (32° to 120° Fahrenheit)
- Case Finish Black anodized
- Cabling Two wires required

DC-Digital DC-25 Clock Description

The DC-Digital Clocks are designed to run and reset off two wires, as opposed to most digital clocks, which require four wires. This patented design can be used in either existing buildings or new construction. Model DC-256 is a 2.3" display, that runs off of DC power. AC-256 and the AC-256A are 2.3" displays, that run off of AC power.

DC-Digital Clocks can be used as stand-alone non-system clocks, or can be linked via most master clocks to form a hourly and a 12-hour automatic correction system. Using DC-Digital accessories, these clocks may be adapted to existing flush-mounted back boxes.
